EDUCATION

Our Education Initiative takes a holistic approach to impacting Chicago education reform. We focus on the academic achievement of students, empowering adult caregivers, strengthening character development education and improving school cultures.

Tutoring

We recruit volunteers from local churches to support after school tutoring for primarily 2nd & 3rd grade students with a focus on Reading and Math.

Mentorship

We offer weekly character development support and facilitate academic check ins during the day to the entire class, small affinity groups and individual students.

Adult Support

We provide weekly coaching and quarterly professional development empowering adults (including teachers, parents, and others) to prioritize mental health and the mental health of students. We cover trauma-informed care, mindfulness, social and emotional learning, how nurture promotes academic success, and much more.

Collaboration

We collaborate with other youth serving organizations to create collective impact toward education reform in Chicago.
